

**LOOKING TO THE FUTURE  
AND LEARNING FROM THE PAST...**

**LOOKING FOR A COST EFFECTIVE WAY TO DRESS UP YOUR CARGO TRAILER?**

The new Lippert Cargo Entry Door offers a stylish and aesthetically pleasing design at a competitive price to complete the look of your cargo trailer. The idea was a simple one. Design a cargo door that addresses all the needs of today's manufacturing while staying true to the appeal of design the retail customer is demanding. Identifying the need for the new entry door was just the beginning. The design needed to be cost effective, innovative and bold. The new design is now available to all cargo trailer manufacturers and ready to help drive market in value and design.

# SLAMMING THE DOOR ON COMPETITION!

## **Feature: COST, COST, COST....**

Benefit: *Why build internally if cost isn't a factor? Why order a door with less features at the same cost? More value for the dollar. We are adding to your success story, not your bill of materials.*

## **Feature: Solid Expanded Polystyrene (EPS) laminated core construction**

Benefit: *One piece laminated core provides superior strength and durability. Without using wood or any corrosive materials in the design of the product the new door is not only lighter weight than the traditional cargo door, but it allows for less chance of breakdown and wear over time.*

## **Feature: Pre-cambered inner door with automotive "D" seal**

Benefit: *The pre-camber on the door provides a tight weather-proof seal around the entire door perimeter.*

## **Feature: Integrated hinge that is pre-mounted to door assembly**

Benefit: *Integrated hinge decreases installation time substantially. Not only does the design save installation, but it promotes cost savings by not needing additional components to complete installation. No **barn door hinges** and no **bar lock hinges** need to be added.*

## **Feature: Moving forward from the past with the radius corner design found on all the new cargo entry doors from Lippert**

Benefit: *Eliminates unsightly mitered corners that can leak in time. Eliminates any possible awning damage when using an awning in conjunction with the new radius design.*

## **Feature: Aluminum snap trim and low profile drip rail design**

Benefit: *Cover Installation screws with color matched trim that won't fade or discolor over time. The low profile drip rail adds to the stylish look of the door while maintaining a sleek profile to **avoid snagging** when loading or entering the trailer.*

## **Feature: Rigid "I Beam" design threshold**

Benefit: *Reinforced threshold designed to withstand heavy traffic.*

## **ASK ABOUT OUR "U-SKIN-IT" PROGRAM!**

Our doors are available pre-laminated with multiple exterior skin options, or you may choose to use the "U-Skin-It" program and bring the doors in prepared for skin installation to assist in keeping inventory levels low and install the color of your choice.
